SUMMARY

Frontend engineer with 9+ years building production web apps in React, Next.js and TypeScript, currently Software Engineer II at Strativ, shipping booking and admin products for European clients. Leads features from API contract to release, reviews code and mentors developers, working async with a team in Sweden. Strong in accessible, fast UI built from Figma designs. Known for building internal tools and AI-assisted workflows that cut repetitive work for the whole team. Previously led a frontend team and delivered products for blockchain clients and the Envato marketplace.

SKILLS

Languages: TypeScript, JavaScript (ES2023), HTML5, CSS3, Swift

Frontend: React, Next.js (App Router, Server Components), React Query (TanStack), Redux, Zustand, React Hook Form, Zod, Ant Design, Material UI, Tailwind CSS, Vite

Performance & accessibility: Core Web Vitals, bundle and render optimization, WCAG

Testing: Jest, Vitest, React Testing Library, Playwright, Cypress, Storybook

Backend: Node.js, Express.js, Prisma ORM, PostgreSQL, MongoDB, SQLite, REST APIs

Tooling & CI/CD: Git (worktrees, hooks), GitHub Actions, Vercel, Jira, Sentry, Figma, Chrome Extensions API

AI-assisted development: Claude Code, Cursor, Codex, project-level agent rules (CLAUDE.md), LLM context tooling

EXPERIENCE

Software Engineer II (Frontend) — Strativ

May 2024 – Present

Dhaka, Bangladesh (Strativ AB, Sweden)

- Lead features end to end, from API contract to release, on customer-facing booking products: admin dashboard, embeddable booking widget and tour customer portal (React, TypeScript, React Query, Ant Design).
- Shipped a Gift Card Widget end to end and extended waitlist booking logic across the admin app and booking widget.
- Make frontend architecture and technical decisions, review teammates' pull requests, and mentor and onboard new developers.

- Built and maintain a reusable component library; improved Core Web Vitals and resolved WCAG accessibility issues on customer-facing pages.
- Built a Timetables page from Figma against a mock API so UI work was not blocked on backend; diagnosed and fixed a Sentry-flagged production RangeError in the customer portal.
- Rolled out AI-assisted development across projects (agent rule files, a codebase knowledge graph, an LLM output-filtering CLI), plus a pre-commit AI code-review hook and automated daily standups from Jira data.

Frontend Software Engineer — NexusLab

2022 – Apr 2024

Mirpur DOHS, Dhaka

- Built frontend applications for crypto and blockchain clients using React, Next.js, TypeScript, Material UI and Tailwind CSS.
- Shipped Next.js apps using the App Router and Server Components for international businesses, with a focus on secure, responsive UI.

Freelance Frontend Developer — Upwork & Early-stage Startup

Oct 2021 – 2022

Remote

- Delivered frontend projects for international clients on Upwork.
- Built the frontend for an early-stage startup whose main client was a large overseas youth football academy; the company later closed.

Senior Frontend Software Developer — ItechSoft Solutions

May 2018 – Sep 2021

Khulna, Bangladesh

- Led and mentored a team of frontend developers, owning code reviews and delivery for client projects.
- Built React and Next.js applications for top clients, including products sold on the Envato marketplace.
- Moved the team's stack toward React, Next.js and Node.js.

Freelance Frontend Developer & ThemeForest Author — Self-employed

Nov 2017 – May 2018

Remote

- Delivered frontend projects for international clients on PeoplePerHour.
- Built and sold HTML5 templates on ThemeForest as author codexfusion, with documentation and buyer support for each.
- Rokstar, a one-page portfolio template, reached 325+ sales with a 5.0 buyer rating.

Frontend Developer — ByteCode (Digital Marketing Firm)

May 2017 – Nov 2017

Gulshan-1, Dhaka

- Built responsive marketing websites and landing pages as a junior developer.

SELECTED PROJECTS

- **WorkPilot (macOS app, public beta):** Creator and maintainer, working with 3 contributors. In daily use by working engineers, shipped through its own self-updating release pipeline (35+ versions). A native Swift app that records commits, PRs, meetings and Jira activity, then writes worklogs and standups from it. Integrates Jira, Git, GitHub, Bitbucket and Google Calendar; all data stays on-device in SQLite. Optional AI via the Claude CLI, plus an on-device Apple Intelligence text fixer that rejects any rewrite that changes facts.
- **Mod Header (Chrome extension):** Replacement for a pulled third-party header-modding tool, built with minimal permissions and local-only storage.
- **Mac proximity auto-lock (Swift package):** Locks the screen when the paired iPhone moves away, using CoreBluetooth BLE signal strength.

EDUCATION

- **BSc in Computer Science and Engineering** — World University of Bangladesh · 2023 – Present
- **Diploma in Computer Engineering** — Saic Institute of Management & Technology · 2017
