TL;DR

Frontend engineer with 9+ years building production web apps in React, Next.js and TypeScript. Currently Software Engineer II at Strativ, shipping booking and admin products for European clients. I lead features from API contract to release, review code, mentor developers, and build the internal tools and AI-assisted workflows that take repetitive work off the whole team.

EXPERIENCE

Software Engineer II (Frontend) — Strativ

May 2024 – Present

- Lead features end to end — API contract to release — across customer-facing booking products: admin dashboard, embeddable booking widget and tour customer portal.
- Shipped the Gift Card Widget end to end and extended waitlist booking logic across the admin app and booking widget.
- Own frontend architecture decisions, review pull requests, and mentor and onboard new developers.
- Built and maintain a reusable component library; improved Core Web Vitals and fixed WCAG issues on customer-facing pages.
- Built a Timetables page from Figma against a mock API so UI work never waited on the backend; traced and fixed a Sentry-flagged production RangeError in the customer portal.
- Rolled out AI-assisted development across projects: agent rule files, a codebase knowledge graph, an LLM output-filtering CLI, a pre-commit AI code-review hook, and standups generated automatically from Jira data.

Frontend Software Engineer — NexusLab

2022 – Apr 2024

- Built frontend applications for crypto and blockchain clients with React, Next.js, TypeScript, Material UI and Tailwind CSS.
- Shipped Next.js apps on the App Router and Server Components for international businesses, focused on secure, responsive UI.

Freelance Frontend Developer — Upwork & early-stage startup

Oct 2021 – 2022

- Delivered frontend projects for international clients on Upwork.
- Built the frontend for an early-stage startup whose main client was a large overseas youth football academy.

Senior Frontend Software Developer — ItechSoft Solutions

May 2018 – Sep 2021

- Led and mentored a team of frontend developers, owning code reviews and delivery for client projects.
- Built React and Next.js applications for top clients, including products sold on the Envato marketplace.
- Moved the team's stack toward React, Next.js and Node.js.

Freelance Developer & ThemeForest Author — Self-employed · codexfusion

Nov 2017 – May 2018

- Delivered frontend projects for international clients on PeoplePerHour.
- Built and sold HTML5 templates on ThemeForest, with documentation and buyer support for each.
- Rokstar, a one-page portfolio template, passed 325 sales with a 5.0 buyer rating.

Frontend Developer — ByteCode (digital marketing)

May 2017 – Nov 2017

- Built responsive marketing websites and landing pages — where it all started.

BUILT & SHIPPED

WorkPilot — Native macOS app · public beta
The timesheet that fills itself in.

AgentBoy — Native macOS app
A floating pill at the top of the Mac screen that shows every running Claude Code session — working, thinking, waiting, done — plus live usage limits.

Tour & transport booking SaaS — Production · Strativ
Multi-tenant booking platform for European operators: admin panel, embeddable booking widget, gift-card widget, customer portal.

AI-Driven Traffic Control — Computer vision · thesis
Detects vehicles across multiple lane feeds and sets green-light time by lane density. Emergency vehicles get an immediate green.

handctl — macOS · gesture control
Control your Mac with your hands through the webcam: fist for Mission Control, a peace sign for a screenshot, swipes to switch desktops.

Futsal Formation Builder — Web app · live
A visual tactics board: 3D-tilted pitch, jersey tokens, squad sheets, drawing layer, zoom, local saves and export to image.

Mod Header — Chrome extension · MV3
A privacy-first replacement for a pulled header-modding tool: set, append or remove request/response headers with minimal permissions.

Cadet academy website — Client work · Next.js
Full school site with admissions, academics, gallery, news, notice board, staff directory and an admin panel.

SKILLS

Languages	TypeScript, JavaScript (ES2023), HTML5, CSS3, Swift
Frontend	React, Next.js (App Router, RSC), TanStack Query, Redux, Zustand, React Hook Form, Zod, Ant Design, Material UI, Tailwind CSS, Vite
Quality	Core Web Vitals, Bundle & render optimization, WCAG, Jest, Vitest, Testing Library, Playwright, Cypress, Storybook
Backend	Node.js, Express, Prisma, PostgreSQL, MongoDB, SQLite, REST APIs
Tooling	Git (worktrees, hooks), GitHub Actions, Vercel, Jira, Sentry, Figma, Chrome Extensions API
AI-assisted dev	Claude Code, Cursor, Codex, Agent rule files (CLAUDE.md), LLM context tooling

---

EDUCATION

BSc in Computer Science & Engineering — World University of Bangladesh · 2023 – Present
Diploma in Computer Engineering — Saic Institute of Management & Technology · 2017
